Bekasi City, West Java 17148

## Summary

Dedicated 3rd-year Information Technology student at Bina Sarana Informatika University with a 3.93 GPA, specializing in frontend web development. Proven track record in achieving perfect scores in Logic & Algorithm, Human-Computer Interaction, and Web Programming. Skilled in HTML, CSS, JavaScript, and PHP, with practical experience in building responsive and user-friendly web applications. Passionate about leveraging skills to create impactful digital solutions.

## Education

**Universitas Bina Sarana Informatika** — **Bekasi City, West Java**
Bachelor of Technology — 2021 – 2025 (expected)

- **GPA**: 3.93/4.00
- **Relevant Subjects**: Logic & Algorithm, Human-Computer Interaction, Data Structure, and also Web Programming I & II.
- Enjoy leading groups and collaborating on project tasks to achieve the best results. I am driven by a passion for solving problems and a desire to create impactful web applications.

## Projects

**Web Programming II Project** | GitHub

*Septiandy's Dining* — 2024

- **Description**: Creating a fullstack website (frontend and backend) about a restaurant that consists of a user and admin that I created for my Web Programming II final project.
- **Roles and Responsibilities**: Thinking about the concept and direct execution in making the website.
- **Technology and Tools Used**: Visual Studio Code, HTML, CSS, Javascript, PHP, SQL, and Github.
- **Results and Achievements**: This project successfully implemented what was learned during the semester which resulted in a responsive website and a perfect grade (A).

**Web Programming I Project |** Live Demo | GitHub

*Ascendio* — 2022

- Description: Creating a simple website with information about Indonesian restaurant called Ascendio. It is a front-end website that my team and I created for our Web Programming I final project.
- Roles and Responsibilities: Thinking about the concept and coordinating with team and then direct execution in making the website.
- Technology and Tools Used: Visual Studio Code, HTML, CSS, Javascript, and Github.
- Results and Achievements: This project successfully implemented what was learned during the semester which resulted in a responsive website and a perfect grade (A).

**Logic & Algorithm Project**

*Implementation of Dijkstra's Algorithm for Shortest Path Determination* — 2021

- **Description**: Apply Dijkstra's algorithm to determine the shortest path in a directed graph representing a campus map.
- **Roles and Responsibilities**: As a team member, responsible for designing the graph and implementing the algorithm in the program.
- **Technology and Tools Used**: Python, NetworkX, Matplotlib.
- **Results and Achievements**: The algorithm successfully found the shortest path with high accuracy, helping students find the fastest route on campus. The project received a perfect grade (A) and is proposed to be further developed into a mobile application.

## Skills

**Programming Language**: HTML, CSS, Javascript, Python, and PHP.

**Tools**: Visual Studio Code, Git and Github, Canva, Microsoft Office (Word, Excel, and Powerpoint), and also Google Spreadsheet.

**Soft Skills**: Creativity, Teamwork, Problem-solving, Leadership, Adaptability, Organization, and Detail-oriented.

**Natural Language**: Indonesian and English (Proficient)

## Certifications

- **Dicoding Indonesia**
  - Programming Logic 101 | Credential 2024
  - Getting Started with Python Programming | Credential 2024
  - Getting Started with Java Programming | Credential 2024
  - Basic Learning of Structured Query Language (SQL) | Credential 2024
  - Basic Web Programming | Credential 2024
  - Basic Learning of Javascript | Credential 2024
  - Basic Git with Github | Credential 2024
- **Cisco Certified Network Professional (CCNP)**
  Programming Essentials In Python | Credential 2023
